3Q26 preview: likely meets consensus, with further upside possible

Samyang Foods likely posted 3Q26 consolidated sales of W804.9bn (+27.4% YoY, +4.5% QoQ) and OP of W183.3bn (+40.1% YoY, +4.1% QoQ, OPM 22.8%), in line with consensus. Sales volume likely continued to increase in the US on the back of mainstream channel expansion and new buyer accounts in Mexico, while China likely reflected front-loaded shipments ahead of the Mid-Autumn Festival and Singles' Day. However, the recognition of about W20bn in sales from the UK and some European clients could be deferred to 4Q26 due to changes in supply terms. We believe this reflects a temporary timing difference driven by transaction term changes rather than slowing local demand.

In terms of profitability, GPM, which rose to 48.1% in 2Q26, likely decreased due to the strong won and the burden of raw material and logistics costs, but lower marketing expenses likely partially offset this, keeping OPM in the 22%-range. Meanwhile, one-off gains from tariff refunds serve as an additional earnings upside catalyst. Given uncertainties regarding the refund size and timing of recognition, estimates were kept conservative, and depending on the actual amount realized, OP could beat our estimates.

Expanding sales volume and potential price hikes in 2027

In 2027, capacity expansion will likely gain momentum with the operation of the Jiaxing plant in China. The plant, with an annual capacity of 1.13bn servings, is especially significant, as it will shift China-bound volume previously handled by domestic facilities to local production, thereby reallocating spare domestic capacity to high ASP markets including the US and Europe. Combined with rising utilization at Miryang Plant 2, overseas sales volume growth will likely continue.

There is further room for growth in terms of price as well. Given increasing raw material and logistics costs, there is a growing need to adjust overseas selling prices, and upward price movements are already visible in some markets. If additional price hikes materialize across key overseas markets in 2027, rising ASPs should amplify sales volume growth. Localized production in China is also expected to drive logistics cost savings and improve profitability. In the mid- to long term, the possibility of new overseas plant construction beyond China warrants attention. Securing additional production bases to address expanding global demand would help to sustain growth momentum.

We estimate 2027 consolidated sales at W3.85tn (+23.3% YoY) and OP at W921bn (+27.9% YoY, OPM 23.9%). Recent share price corrections have dragged down 2027E P/E to around 13x. Now is time to focus on expanding sales volume and the operation of a new Chinese plant and potential price hikes, rather than short-term forex burdens. We maintain BUY and our target price of W2,000,000.
