3Q26 preview: likely misses market expectations slightly

In 3Q26, CJ Cheiljedang (CJCJ) likely posted consolidated sales of W7.26tn (-14.1% YoY) and OP of W332.8bn (-21.7% YoY, OPM 4.6%). Excluding CJ Logistics, sales likely came to W4.19tn (+4.6% YoY) and OP W182.2bn (-4.1% YoY, OPM 4.4%), missing the average market estimate (about W195bn) by 6.7%.

Food sales likely came to W3.13tn (+4.8% YoY) and OP W118bn (-30.0% YoY). Domestically, despite a recovery in processed food sales, the materials business likely remained sluggish, while overseas growth likely slowed due to the strong won and softening US pizza market, despite increased sales of global strategic products (GSP) including mandoo and shelf-stable rice. In particular, margin recovery was likely limited due to the ongoing burden of shipping and raw material costs. Meanwhile, bio business OP likely came to W64.2bn (+200.0% YoY, OPM 6.1%), maintaining a recovery centered on lysine and specialty products, although profitability likely fell slightly QoQ.

Bio recovery to drive earnings improvement in 2027

In 2027, the earnings recovery is expected to be driven mainly by the bio business. Selling prices and sales volume are expected to improve thanks to US tariffs on Chinese lysine and European anti-dumping measures, while market conditions for tryptophan are also recovering. As for the food business, domestic price hikes should be reflected starting in 4Q26, and the operation of the Hungary plant in 2027 will likely lead to an expansion of GSP supply in Europe. However, given slowing consumption in the US and the burden of shipping costs, a conservative approach is needed towards the pace of margin recovery. Shares currently trade at a single-digit P/E based on 2027 earnings estimates, suggesting that concerns over sluggish earnings have been largely priced in. A sustained bio earnings recovery and easing raw material cost pressure in the food business are the core conditions required for a share price rebound.
