LS Electric (010120)

Solid performance in uncertain times

- Despite a stronger won and seasonal headwinds, LS Electric posted q-q operating profit growth, beating consensus.
- Data center-related contracts, which contribute to profits quickly, has increased, and capacity expansions are progressing as originally planned—limiting downside risks to both short- and long-term earnings estimates.
- The company has consistently delivered excellent earnings despite various uncertainties, creating an environment where its valuation premium can be sustained.

WHAT'S THE STORY?

Excellent 3Q results: LS Electric's sales and operating profit beat consensus by 12% and 20%, respectively, while also showing q-q growth. When adjusted for forex fluctuations and seasonality (such as operating days), the performance appears even more robust. Although one-time costs arose from restructuring in the China business, these were offset by one-time refund of US tariffs. Excluding the one-off gains, the flagship electric business still posted q-q growth. Active hedging against forex risks in the electric infrastructure segment—which is project driven—proved highly effective.

Order intake and capacity expansion also on track: Order acquisition and capacity expansion—key drivers of future earnings—are also progressing smoothly. Cumulative order intake through 3Q has reached KRW4.76t, exceeding last year's annual total by 28%. More than half of these orders are tied to data center projects, which typically have short lead times between order taking and sales recognition. This means a significant portion of these orders will contribute to earnings soon, limiting downside risk to short-term earnings forecasts.

EPS	9,554	3,690	5,600
BVPS	68,992	16,742	21,442
DPS	3,000	700	900

The addition of new customers, particularly among big tech firms, is another positive sign. Geographically, sales in the highly profitable US market are growing rapidly—this year's US sales are on track to triple y-y. Capacity expansions are also well underway. Domestically, production capabilities are being enhanced through subsidiary LS Power Solution. Internationally, local production systems are being established in Utah and Texas. In parallel, the company is boosting utilization rates at existing plants and leveraging partnerships with suppliers to increase output.

Self-proven premium: The company continues to trade at a premium relative to domestic and overseas peers. Despite macroeconomic uncertainty, won appreciation, and the possibility of a sector peak-out, its consistent record of excellent performance will support the high valuation. Notably, the company's operating profit has met or exceeded market expectations for four consecutive quarters. Consensus earnings estimates for this year and next also continue to be revised upward at a steeper rate than peers. We continue to compute our target price by discounting 2028 earnings to present value and applying the industrial sector's average valuation multiple. Reflecting only the broader market's valuation compression—including industrials—we revise down our target price by 11% to KRW232,000. Even at this lower level, the stock retains meaningful upside potential.

3Q results beat market expectations: LS Electric's 3Q sales and operating profit beat consensus by 12% and 20%, respectively. Both sales and profit grew q-q. When adjusted for won appreciation and seasonality (such as operating days), the performance appears even more robust. Although one-time costs arose from restructuring in the China business, these were offset by one-time refund of US tariffs. Excluding the one-off gains, the flagship electric business still posted q-q growth. By segment, electric equipment sales and profit stalled due to forex impacts. Given the mass-production nature of the electric equipment business, hedging forex risk is structurally difficult. In contrast, electric infrastructure sales improved significantly. For the electric infrastructure segment, which is project-driven, the company actively applies hedging policies, helping maintain high profit margins.

Order acquisition and capacity expansion on track: Order intake and capacity expansion—key drivers of future earnings—are also progressing smoothly. Cumulative order intake through 3Q has reached KRW4.76t, exceeding last year's annual total by 28%. More than half of these orders are tied to data center projects, which typically have short lead times between order taking and sales recognition. This means a significant portion of these orders will contribute to earnings soon, limiting downside risk to short-term earnings forecasts. The addition of new customers, particularly among big tech firms, is another positive sign. Geographically, sales in the highly profitable US market are growing rapidly—this year's US sales are on track to triple y-y. Capacity expansions are also well underway. Domestically, production capabilities are being enhanced through subsidiary LS Power Solution. Internationally, local production systems are being established in Utah and Texas. In parallel, the company is boosting utilization rates at existing plants and leveraging partnerships with suppliers to increase output.

Reason for premium, proven by itself: LS Electric continues to trade at a premium relative to both domestic and overseas peers. Despite growing macroeconomic uncertainty, a stronger won posing near-term earnings pressure, and concerns about a potential sector peak-out, its consistent record of excellent performance will justify the premium valuation. Notably, its operating profit has met or exceeded market expectations for four consecutive quarters. Restructuring of low-margin businesses, new customer acquisition, and capacity expansions are progressing on schedule, while visibility into future growth is high. Consensus earnings estimates for this year and next are steadily being revised upward—and at a stronger pace than those of its competitors.

Despite a premium valuation relative to peers and recent market corrections, we maintain our BUY rating. We continue to compute our target price by discounting 2028 earnings to present value and applying the industrial sector's average valuation multiple. Reflecting only the recent decline in market-wide valuations—including industrials—we revise down our target price by 11% to KRW232,000. Even at this lower level, the stock retains meaningful upside potential.

This report is not an invitation nor is it intended to be an inducement to engage in investment activity for the purpose of section 21 of the Financial Services and Markets Act 2000 of the United Kingdom ("FSMA"). To the extent that this report does constitute such an invitation or inducement, it is directed only at (i) persons who are investment professionals within the meaning of Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2001 (as amended) of the United Kingdom (the "Financial Promotion Order"); (ii) persons who fall within Articles 49(2)(a) to (d) ("high net worth companies, unincorporated associations etc.") of the Financial Promotion Order; and (iii) any other persons to whom this report can, for the purposes of section 21 of FSMA, otherwise lawfully be made (all such persons together being referred to as "relevant persons").

Any investment or investment activity to which this report relates is available only to relevant persons and will be engaged in only with relevant persons. Persons who are not relevant persons must not act or rely on this report.

For reports to be distributed to Korea:

This report is for private circulation only, not for sale, and is issued and distributed only to persons permitted under the laws and regulations of Korea.

For reports to be distributed to Singapore:

This report is provided pursuant to the financial advisory licensing exemption under Regulation 27(1)(e) of the Financial Advisers Regulation of Singapore and accordingly may only be provided to persons in Singapore who are "institutional investors" as defined in Section 4A of the Securities and Futures Act, Chapter 289 of Singapore. This report is intended only for the person to whom Samsung Securities has provided this report and such person may not send, forward or transmit in any way this report or any copy of this report to any other person.

Analyst certification

The views expressed in this research report accurately reflect the personal views of the analyst(s) about the subject securities or issuers and no part of the compensation of such analyst(s) was, is, or will be directly or indirectly related to the inclusion of specific recommendations or views in this research report. The analyst(s) principally responsible for the preparation of this research report receives compensation based on determination by research management and senior management (not including investment banking), based on the overall revenues, including investment banking revenues of Samsung Securities Co., Ltd. and its related entities and has taken reasonable care to achieve and maintain independence and objectivity in making any recommendations.
